

PARENTS!

Do you have a baby under 6 months old?

Eligible, participating families who join the **TEAMS** research study at **Kennedy Krieger** will receive...

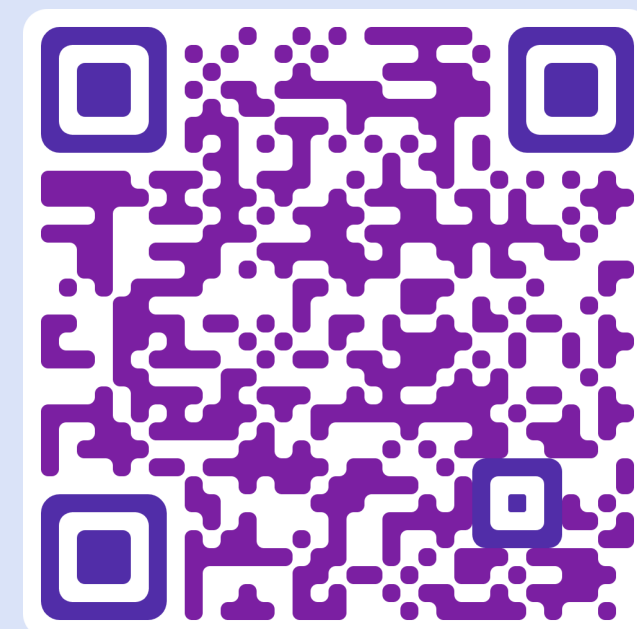

- Two free developmental assessments.
- \$45 after each study visit.
- Referral for a formal clinic evaluation if concerns are identified during research assessments.

Researchers at Kennedy Krieger are studying how infants learn language early in life. By learning about your child's development, we aim to improve methods for identifying children who may benefit from early intervention.

STEP 1: SIGN UP!

<https://bit.ly/3rPKoCt>

Consent to participate in the study, and answer some short questions about you and your child.

STEP 2: YOUR CHILD'S FIRST VISIT!

When your child is **6-8 months old**..

Your child will complete a **play-based developmental assessment** (about 30-45 minutes) and an **EEG** (about 20 minutes) at Kennedy Krieger Institute.

STEP 3: YOUR CHILD'S SECOND VISIT!

When your child is **12-14 months old**..

Your child will complete the same play-based developmental assessment and EEG from the first visit. Your child's developmental progress will be shared with you.
